BONDING

Bonding can improve your smile by using a special light to “bond” resin material that hardens to your teeth.

FILL CAVITIES

EXTEND TEETH

RESHAPE TEETH

REPAIR DISCOLORATION

CLOSE SPACES

REPAIR CHIPPED TEETH

WHAT IS IT USED FOR?

BONDING FACTS!

Time it takes for the procedure?

30 - 60 Minutes
Per Tooth

Lifespan?

3-10 Years

Cost?

Can it stain?

Yes!

DISADVANTAGES:

- Does not last as long
- Material can chip
- Does not resist stains as well as crowns

ADVANTAGES:

- Cheapest option & easy procedure
- Good for small cosmetic changes
- Least amount of enamel removed
- Anesthesia is usually not required
